QSPEC PROFESSIONAL DEVELOPMENT DAYS

Qspec Professional Development Days provide health professionals in the home modification industry with a complimentary opportunity to build their knowledge and confidence in prescribing home modifications.

Held either at the Qspec showroom or delivered face-to-face at external locations, these sessions offer valuable insights into complex and non-structural modifications, assistive technology solutions, and streamlined referral pathways.

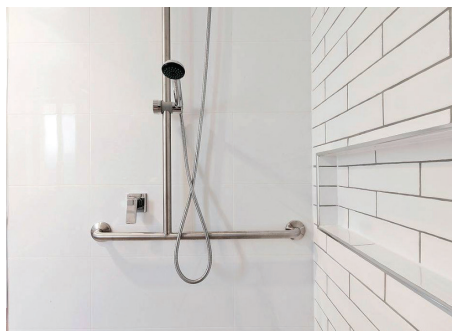

The program is delivered across six modules, running for approximately 2–4 hours, with all attendees receiving a certificate of attendance.

Designed to be both practical and informative, these sessions support health professionals in understanding the home modification process and how Qspec can effectively collaborate to achieve safe, functional outcomes for their clients.

MODULE 1: INTRODUCTION TO QSPEC

MODULE 2: NON-STRUCTURAL MODIFICATIONS

MODULE 3: BIDETS

MODULE 4: ASSISTIVE TECHNOLOGY

MODULE 5: COMPLEX MODIFICATIONS

MODULE 6: REFERRAL PROCESS
