## Spray Functions

Apart from the standard wash you would expect when using a bidet, the spray width can be adjusted from narrow to wide so you can personalise the wash to your needs. Coway is the only brand that has this function.

## Air injection

Coway technology combines air bubbles with the water stream.

This provides a 40% better clean than water alone.

Air injection can be turned on or off for your perfect wash.

## Twin Nozzles

Separate nozzles for bottom wash and ladies wash prevents cross contamination.

Twin nozzles allow for accurate placement and delivery of the cleansing wash.

Nozzles are adjustable to 5 different positions.

## CONTACT US

### Safe Weight Limit

The BA08 has the highest safe weight limit of 200KG. Making it ideal for heavier users.

### One Button Operation

A special remote control holder has been designed to allow for ease of use.

The holder specifically hides all of the adjustment controls, leaving just the basic operation and auto wash and dry function.

*\*Accessory available upon request.*

### Specifically designed for those in need

The BA08 healthcare bidet has been specifically designed for those with toileting issues, are physical or visually challenged.

### Antimicrobial Plastic

The external plastic components of the seat, lid and top case are treated with an antimicrobial coating to stop bacteria from living on your bidet.

### Filter

The filter is so easy to change, it just twists out like a light bulb.

There is a choice of standard or silver ion filter.

### Germ and Virus Protection

The colloidal silver impregnated ceramic filter helps remove bacteria, germs, and viruses.
